

Instructions for 3 players

Goal: Make as many sets as possible

- 1.** Deal each player 7 cards. Place remaining cards in the middle and flip the top card face up to make a discard pile
- 2.** First player clockwise to the dealer goes first. Each turn follows this pattern:
 - a. Draw a card (see below)
 - b. Place a set on the board (and/or append to another player's set if you already have a set yourself) or pass
 - c. Discard a card
- 3.** Play continues until first player gets rid of all cards

Drawing Cards

A card may be drawn from the face down pile or from the discard pile. If a card is drawn from the discard pile, it must be used during that turn. If that card is from the middle of the discard pile, the player must take all the cards above it.

Limbo

A situation may occur where a player may run out of cards, but has no remaining cards to discard. In this case, gameplay will continue one more round until that player can draw and subsequently discard.

Scoring

15 points - square brackets, if cards, 0 cards

10 points - operators

5 points - variables and remaining integer cards
